

THINK SEPSIS. ACT FAST.

SEPSIS IMPROVEMENT

Kelly Sykes, State-wide Sepsis Project Lead RMH / Senior Project Officer Safer Care Victoria

OVERVIEW

New South Wales
Clinical Excellence
Commission
'Sepsis Kills'

Peter MacCallum
Cancer Centre

Royal Melbourne
Hospital

(Better Care Victoria
Innovation Fund)

11 health services/
23 hospitals

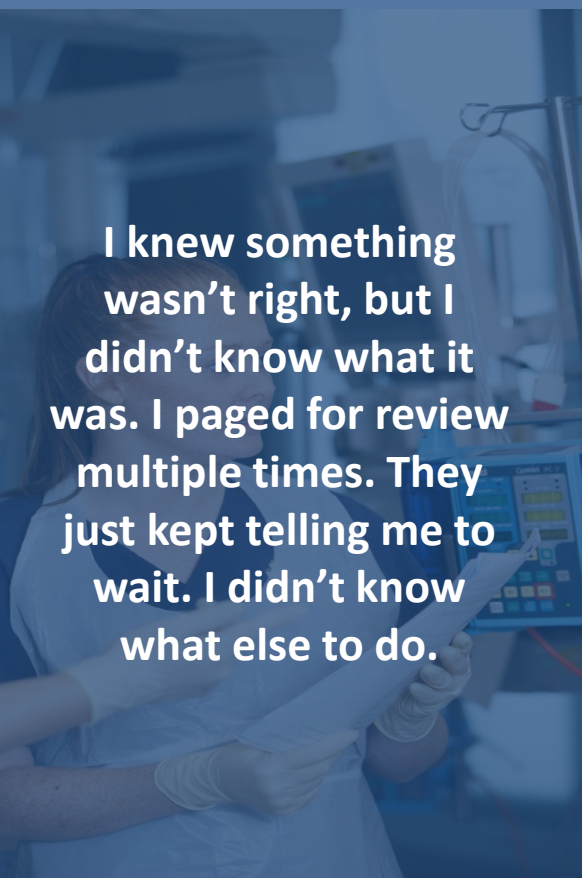

(Better Care Victoria
Innovation Fund)

CASE

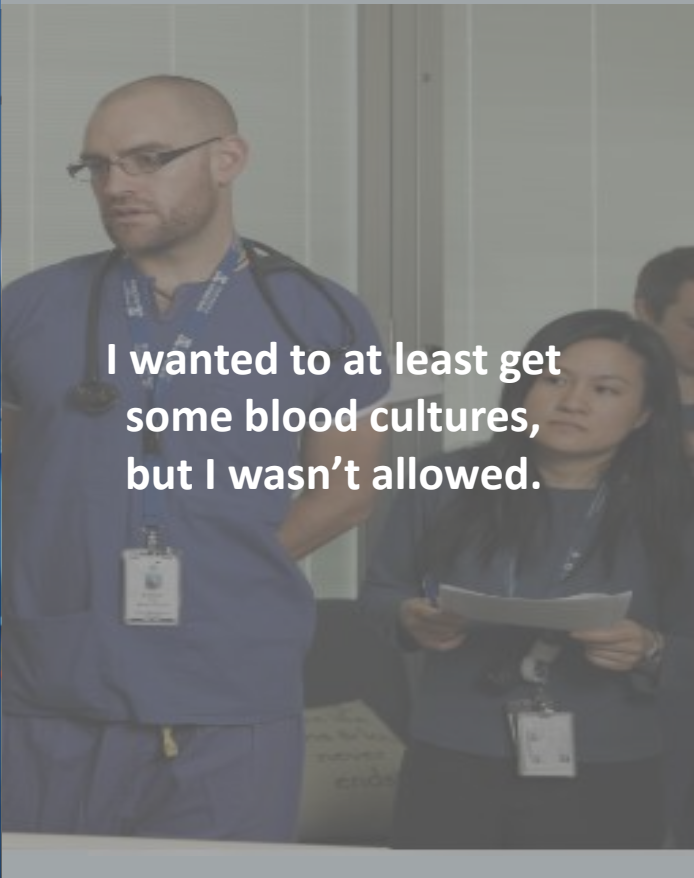

- ▶ 28 y/o male Tim* presents to clinic
- ▶ Background of pancytopenia
- ▶ Admitted for worsening neurological symptoms
- ▶ Treated with IV steroids
- ▶ Deterioration over hours
- ▶ Delayed recognition & delayed management

*Name has been changed

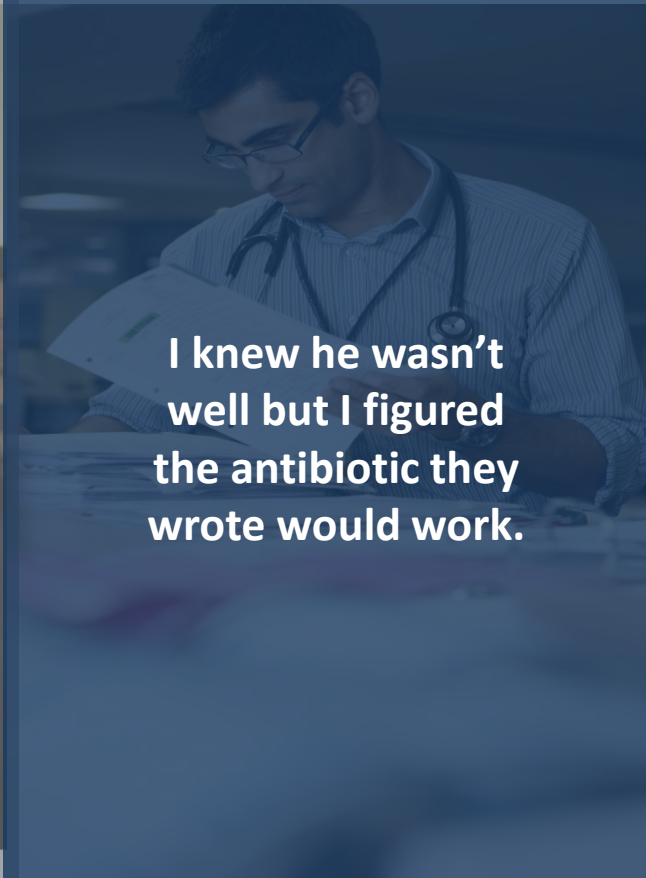

A NEED FOR CHANGE

I knew something wasn't right, but I didn't know what it was. I paged for review multiple times. They just kept telling me to wait. I didn't know what else to do.

I wanted to at least get some blood cultures, but I wasn't allowed.

I knew he wasn't well but I figured the antibiotic they wrote would work.

The Royal
Melbourne Hospital

Why a Pathway?

What is sepsis?

Sepsis is difficult to define, diagnose, and treat

Melbourne Health

Process mapping showed variability in recognition and management

Patient outcomes

20% mortality during MET calls

Evidence

Quicker management = better outcomes!

OBJECTIVES

Improve time to antibiotics

Improve appropriateness of antibiotics

Increase services utilising pathway

Decrease length of stay for patients with sepsis

Decrease sepsis related ICU admissions

Decrease sepsis related mortality

BARRIERS & CHALLENGES

- Escalation
- Equipment
- Cannulation
- After-hours review
- Antibiotic availability
- ED to ward transfer
- Subacute access to pathology
- Busy!

INTERVENTIONS

**Baseline
performance**

**Evidence based
clinical pathway**

**Hospital-wide
education**

**Communications
and marketing
plan**

**Electronic
triggers**

**Data collection
and real time
feedback**

DAILY PROCESS

**Sepsis rounds
and Pathway
audit**

**Restricted
antibiotic audit**

Electronic tools

Daily summary

**Medical team
feedback**

**Nursing team
feedback**

PATHWAY OVERVIEW

Medical record form

6 hour bundle

6 key actions in 60min

Empiric guidelines included

ADULT SEPSIS PATHWAY

1. Does your patient have a known or suspected infection?

- History of fevers or rigors
- New or unaccustomed pain or myalgias
- Indwelling medical devices
- Recent surgery or invasive procedure
- Neutropenia or recent chemotherapy
- Respiratory: cough, shortness of breath
- Abdominal: pain, peritonism
- CNS: decreased mental alertness, headache
- Genitourinary: dysuria, frequency
- Skin: cellulitis, wounds

2. Does your patient have abnormal vital signs?

SEVERE SEPSIS
≥2 of the following:
• SBP < 100 mmHg
• Altered mental status
• Lactate ≥2 mmol/L

SEPSIS WARNING SIGNS
≥2 of the following:
• Temperature <36°C or >38°C
• Heart Rate >90 per minute
• Respiratory Rate >20 per minute
• WCC <4 or >12 × 10⁹/L

AND/OR

YES → This patient is at risk of rapid deterioration / septic shock

YES → Patient may have sepsis

Does your patient have a Goals of Care form and/or Advance Care Plan?
Review before proceeding.

If sepsis most likely then COMMENCE SEPSIS PATHWAY
Notify the Unit Registrar/Consultant/ on call MO
Consider MET/Emergency call or ICU review as required

Consider other causes:

- Myocardial infarct
- Pulmonary embolism
- Haemorrhage
- Cardiac tamponade
- Tension pneumothorax
- Bowel ischaemia
- Transfusion reaction
- Drug reaction

Patient requires:

- Clinical review
- Repeat observations within 30 minutes and manage accordingly
- Re-evaluate for sepsis

Six key actions in 60 minutes:

- Oxygen administration
- Two sets of blood cultures
- Venous blood lactate
- Fluid resuscitation
- Intravenous antibiotics
- Monitoring observations and fluid balance

**Cancer patients currently undergoing systemic chemotherapy require first antibiotic within 30 minutes*

Coding statement (medical officer required to complete):
This patient was treated for GENERALISED SEPSIS during this hospital admission:

Name _____ Designation _____ Signature _____ Pager/jh _____

ADULT SEPSIS PATHWAY MR1199

Acknowledgements: NSW Clinical Excellence Commission, Sepsis Kills Program

CONSENSUS APPROACH

Does your patient have a known or suspected infection?

Does your patient have risk factors, signs or symptoms?

PLUS

≥ 2 Severe signs

SBP < 100 mmHg
Altered mental status
Lactate > 2 mmol/L

YES

This patient is at risk of rapid deterioration/septic shock

AND /
OR

≥ 2 Early warning signs

T $< 36^{\circ}\text{C}$ or $> 38^{\circ}\text{C}$
HR > 90 per minute
RR > 20 per minute

WBC < 4 or $> 12 \times 10^9/\text{L}$

YES

Patient may have sepsis

NO

Look for other causes

KEY ACTIONS IN 60 MINS

Oxygen

2 sets of blood cultures

Lactate

Fluid bolus

Appropriate antibiotics

Continue monitoring

RESULTS

	Baseline	Pathway	P Value
Episodes, n	126	716	
Age, years, median	65.5	66	
Charlson Comorbidity Index, median	4	4	
Sepsis recognised in ED, n (%)	88 (69.8%)	611 (85.3%)	<0.05
Sepsis recognised on ward, n (%)	36 (28.6%)	105 (14.7%)	<0.05
Lactate collected, n (%)	85 (67.5%)	670 (93.6%)	<0.05
≥2 blood cultures n, (%)	53 (42.1%)	611 (85.3%)	<0.05
Time to first dose antibiotics, median, mins	120.5 mins	58 mins	<0.05
Appropriateness of antibiotic (%)	95.2%	97.3%	>0.05
Admission to ICU n, (%)	25.4%	8.8%	<0.05
Length of stay, median, days	7 days	4 days	<0.05
In-hospital mortality (%)	13.5%	6.7%	<0.05
Services using pathway (%)	4%	100%	

OUTCOMES

51.9% reduction in time to antibiotics

100% services using pathway

42.9% reduction in length of stay

65.4% reduction in ICU admissions

50.4% reduction in mortality

IMPACT

“

Nursing

Medical

Consumers

I find it **empowering**. It gives me a voice as a nurse. I
the patient m criteria for sepsis and you
view th delay review I have
I n and **advocate** for my

ject saved n will continue to save
lives. I'm now confident **we're doing the best** for our
patients and their families.

”

IMPACT

Nursing

“

Staff had an increased ability to recognise sepsis, identify what needed to be done and already **began the management process before a doctor had arrived**. It's **extremely rewarding** to prevent deterioration of patients.

A great resource for junior doctors, especially with the empiric antibiotics. It **helps guide us on what to do**.

Medical

Consumers

Junior doctors love that it's straight forward. Consultants like it because patients are getting **recognised earlier**.

”

IMPACT

Nursing

Medical

Consumers

I felt like the Sepsis Pathway was a **call to action**, rallying the troops. The result was a **highly coordinated** response that was time sensitive with **all staff communicating clearly**, thoroughly and including us at all times. We felt at every step that my son was receiving **expert and focused care**.

”

SEPSIS SCALING COLLABORATION

- Better Care Victoria innovation fund
- Scaling MH pathway to 11 health services (23 hospitals)
- MH as lead with support of Safer Care Victoria

Regional Victorian public hospitals

Map showing the locations of public hospitals in Victoria, Australia, categorized by region (Western, Eastern, Southern, Northern). The map includes a scale bar (0 to 100 Kilometres) and a legend indicating the date of the data (Hospitals current at 29 Jun 2017).

Legend:

- Western
- Eastern
- Southern
- Northern

Key Hospitals and Regions:

- Western:** Swan Hill District Health, Kerang District Health, Boort District Health, Rural Northwest Health, Warracknabeal, West Wimmera HS, Nhill, Rochester & Emore District HS, Southern Valley Health, Shepparton, Inglewood & District HS, East Wimmera HS, St Arnaud, Wimmera Health Care Group, Horsham, Bendigo Health Care Group, Maryborough District HS, Malden Hospital, Heathcote Health, Castlemaine Health, Dunmunkle HS, Rupanyup, Edenhope & District Hospital, Stawell Regional Health, East Grampians HS, Ararat, Hepburn HS, Kyneton District HS, Beaufort & Skipton HS, Casterton Memorial Hospital, Western District HS, Hamilton, Moorabool Rural Health, Terang & Mortlake HS, Terang, Hesse Rural HS, Winchelsea, South West Healthcare, Warrnambool, Timboon & District Health, Lorne Community Hospital, Otway Health, Apollo Bay.
- Eastern:** Cobram District Health, Nathalia District Hospital, Numurkah District HS, Yarrawonga Health, Albury Wodonga Health, Albury, Albury Wodonga Health, Wodonga, Tallangatta HS, Upper Murray Health & CS, Corryong, Beechworth HS, Northeast Health Wangaratta, Alpine Health, Myrtleford, Mansfield District Hospital, Omeo District Health, Orbest Regional Health, Bairnsdale Regional HS, Central Gippsland HS, Sale, Latrobe Regional Hospital, Traralgon, Gippsland Southern HS, Leongatha, Yarram & District HS, South Gippsland Hospital, Foster.
- Southern:** Mildura Base Hospital, Robinvale District HS, Robinvale, Mallee Track Health & CS, Ouyen, Sea Lake & District Health Service Inc, Cohuna District Hospital, Yabram & District HS, Southern Valley Health, Shepparton, Inglewood & District HS, East Wimmera HS, St Arnaud, Wimmera Health Care Group, Horsham, Bendigo Health Care Group, Maryborough District HS, Malden Hospital, Heathcote Health, Castlemaine Health, Dunmunkle HS, Rupanyup, Edenhope & District Hospital, Stawell Regional Health, East Grampians HS, Ararat, Hepburn HS, Kyneton District HS, Beaufort & Skipton HS, Casterton Memorial Hospital, Western District HS, Hamilton, Moorabool Rural Health, Terang & Mortlake HS, Terang, Hesse Rural HS, Winchelsea, South West Healthcare, Warrnambool, Timboon & District Health, Lorne Community Hospital, Otway Health, Apollo Bay.
- Northern:** Mildura Base Hospital, Robinvale District HS, Robinvale, Mallee Track Health & CS, Ouyen, Sea Lake & District Health Service Inc, Cohuna District Hospital, Yabram & District HS, Southern Valley Health, Shepparton, Inglewood & District HS, East Wimmera HS, St Arnaud, Wimmera Health Care Group, Horsham, Bendigo Health Care Group, Maryborough District HS, Malden Hospital, Heathcote Health, Castlemaine Health, Dunmunkle HS, Rupanyup, Edenhope & District Hospital, Stawell Regional Health, East Grampians HS, Ararat, Hepburn HS, Kyneton District HS, Beaufort & Skipton HS, Casterton Memorial Hospital, Western District HS, Hamilton, Moorabool Rural Health, Terang & Mortlake HS, Terang, Hesse Rural HS, Winchelsea, South West Healthcare, Warrnambool, Timboon & District Health, Lorne Community Hospital, Otway Health, Apollo Bay.
