# Clorox Total 360<sup>®</sup> System Delivers Superior Results

The Clorox Total 360<sup>®</sup> Electrostatic Sprayer is an efficient, reliable and powerful method to ensure all surfaces — front, back and sides — can be properly disinfected and sanitised.

## The Clorox Total 360<sup>®</sup> System Advantages...

### Power Nozzle Technology

The advanced nozzle design provides highly reliable atomisation and particle size.

**Delivers uniform wraparound coverage on all sides of target.**

### Powerful Air Compressor

The dynamic air compressor enables fast, efficient delivery of charged particles to targeted surfaces.

**Cover more intended surfaces in less time.**

### Reliable Delivery Method

The corded system ensures safe grounding and consistent electrostatic output.

**No variance in performance due to operator handling or battery life.**

## Exceptional Wraparound Coverage vs. Other Sprayers

The Clorox Total 360<sup>®</sup> Electrostatic Sprayer delivers more uniform, wraparound coverage to the targeted surfaces than current sprayers on the market today.\* Superior surface coverage helps provide better protection from the spread of germs.

# Get Superior Coverage with Trusted Solutions... For Healthier Facilities

In facilities where people work, live, and play, illness-causing germs can quickly spread on surfaces. Manual cleaning methods and traditional disinfecting tools aren't designed to effectively reach all areas, leaving facilities and tenants at risk of illness.

## Now a revolutionary new way to get the job done right.

The Clorox Total 360® System pairs an electrostatic sprayer with a portfolio of Clorox disinfectants and sanitisers to ensure all surfaces — even those hard-to-reach, difficult-to-clean areas — are properly treated. The superior coverage helps keep facilities healthier, while also saving time and money.
