Reynard is reassurance.

Reynard Premier detergent & disinfectant wipes.

The cloth that is a cut above.

Our Premier wipes are gentler on materials and have a newly developed soft apertured polyester substrate that boasts superior formulation retention, and extremely good traction to pick up dirt, bacteria and other pathogens. Most other surface disinfecting products are made from thinner, thermal bond polyester substrates that push the dirt or bacteria around, rather than pick it up.

This superior cloth provides significantly higher levels of performance, especially if you are using a one step cleaning and disinfecting protocol. Combined with a softer formulation that will not dry or damage and is safe to use on surfaces and equipment, Premier detergent & disinfectant wipes provide a safe, easy to use and cost-effective infection control solution. Also available in with a completely biodegradable cloth for an environmentally friendly alternative.

The all-in-one wipe that has best in class performance for cleaning and disinfection.

Reynard Premier detergent & disinfectant wipes

Our winning formula.

Biodegradable, non-ionic surfactant with excellent non-streaking and superior wetting properties to provide the wipe with an effective cleaning action and enable the liquid to effectively wet out surfaces.

Our formula incorporates a Fungicide and Chelating agent to enhance the biocidal activity of the wipe. Our proprietary active disinfecting formula contains three active biocidal agents for maximum effectiveness and adaptability.

While germs aren't safe, your equipment is.

Reynard Premier detergent & disinfectant wipes were developed with key clinical equipment providers to ensure an unparalleled range of device and material compatibility. The wipes will not dry or damage surfaces, and are safe to use on plastics, polymers, aluminium, stainless steel, powder-coated surfaces, vinyl and leather. Tested and safe to use on and around equipment. The formula was developed to ensure the wipes would clean hard surfaces and equipment without causing harm.

Testing data.

In December 2019 TGA implemented a new and more stringent Therapeutic Goods Order (TGO) for disinfectants to replace the prior TGO054. Reynard's Premier wipes have been listed with TGA via the new TGO104. There are many competitor products that have not undergone the new TGO104 review and TGA plans post market reviews of all products listed in this area to ensure compliance. Changes include more stringent efficacy testing, including under dirty conditions, and tightening of specific claims and deleting the use of some EN tests for acceptable testing.

Effective against a wide range of pathogenic micro-organisms including bacteria, viruses such as SARS-CoV-1&2 and MERS-CoV virus and fungi.

PATHOGEN	EN Test	Time
Bacteria		
Kills at least 99.999% of pathogens. Effective from 60 seconds		
Enterococcus Hirea	16615	1 min
Staphylococcus Aureus	16615	5 min
Fungi		
Aspergillus Niger	13624	5 min
Candida Albicans	13624	1 min
Candida Albicans	16615	5 min
Candida Auris	13624	1 min
Viruses		
Effective against enveloped viruses		
SARS-CoV-1&2 and MERS	14476	30 sec

Also tested to European standards EN1276, EN13727, EN14348, EN13704, EN1650, EN14675, EN14476, EN14651, EN1656, EN16615

Kills 99.999% of pathogens after just 60 seconds, including bacteria, fungi and viruses such as sars-cov-1&2 and MERS-CoV.

Reynard Health Supplies.

Reynard Health Supplies was established in New Zealand in 1999 and today is the number one supplier of surface cleaning & disinfection wipes, specialist patient care wipes and IV Therapy products to hospitals in New Zealand and Australia.

Reynard Health Supplies is owned by a dedicated group of Australian and New Zealand shareholders who are all actively and directly involved in the day to day operation and development of the business worldwide.

Reynard is reassurance.

At Reynard, we strive to provide products and support services that provide you with the reassurance you need to be able to focus on optimum patient outcomes. This reassurance stems from:

- Quality & Range - a wide range of quality products to suit every need;
- Cost savings - Cost effective solutions;
- Reliability - A reliable, proven supply chain;
- Support - Technical, educational and compliance support services;
- Research & Development - Ongoing product development; and
- Flexibility - The willingness to design new products and supply chain options.

Reynard is reassurance.

Note: the above comparison is with the RHS210, RHS216 and RHS218 cloth. Our RHS200, RHS219 and RHS205 cloth is a thinner thermal bond cloth with similar thickness to the competitor cloth but is still slightly larger.
