

Reynard Health Supplies.

A range as diverse as the germs you encounter.

Germs are a persistent lot. The moment you think you've got one under control it can pop up elsewhere, sometimes in a mutant strain. We talk of wiping them out. To do this you need effective wipes. Detergent wipes for everyday cleaning; disinfectant wipes to control or eradicate a wide range of infection outbreaks; and those designed to improve patient comfort. Reynard develops wipes for your every need. Our goal is to protect patients and everyone who comes into contact with them. While you can concentrate on doing what you do best; caring. As we constantly seek to innovate and improve products to meet your demands our range may well have evolved by the time you visit reynardhealth.com.au.

Reynard is reassurance.

Reynard focus on
killing germs so
you can focus
on saving lives

About

Reynard Health Supplies was established in New Zealand in 1999 and today is the number one supplier of surface cleaning & disinfection wipes, specialist patient care wipes and clinical skin cleansing products to hospitals in New Zealand and Australia.

Reynard is a dynamic company specialising in manufacturing and distributing the highest quality, and most cost-effective products within the healthcare industry.

Our range of products is constantly evolving to meet a wide range of infection control and patient care needs within the healthcare environment.

Our UK based technical staff have been at the leading edge of new product development with enhanced clinical efficacy in the global market for over 30 years.

Used extensively in the private sector and every public healthcare system in Australia.

Recent company Research and Development projects include the launch of our improved formula for our Premier Detergent & Disinfectant wipes (June 2020).

In addition to New Zealand and Australia, Reynard branded products are widely used across the public and private healthcare sector in the United Kingdom and Europe, as well as Asia and the Middle East.

In Australia, Reynard has on going supply contracts with NSW Health, Queensland Health, Health Purchasing Victoria, SA Health, and Western Australia Health for a wide range of products from surface cleaning and disinfecting wipes to patient care products such as 'Bath in Bed Wipes' and 'Shampoo Caps' as well as our range of clinical skin cleansing products.

Throughout the Covid-19 Pandemic, Reynard has prioritised Australian health organisations with uninterrupted supply and has supplied much more to cover shortfalls caused by other suppliers' inability to meet demand.

Reynard Health Supplies is owned by a dedicated group of Australian and New Zealand shareholders who are all actively and directly involved in the day to operation and development of the business worldwide. As responsible businesses, we pay tax in both Australia and New Zealand to support government funding of health services in both countries.

Reynard is reassurance.

Premier detergent & disinfectant wipes

Our winning formula.

A non-ionic surfactant with non-streaking and superior wetting properties. Containing three active biocidal agents for maximum effectiveness and adaptability. Optimised for use in both clinical and non-clinical settings on surfaces and equipment. This single step solution kills 99.999% of pathogens and viruses after just 30 seconds. Tested and ARTG listed for use against SARS and COVID.

The all-in-one wipe that has the best in class performance for cleaning and disinfection.

Testing Data.

Effective against a wide range of pathogenic micro-organisms including fungi and bacteria, viruses such as SARS-CoV-1&2 and Mers-Cov.

Pathogen	EN Test	Time
Bacteria		
Kills at least 99.999% of pathogens. Effective from 60 seconds.		
Enterococcus Hirea	16615	1 min
Staphylococcus Aureus	16615	5 min
Fungi		
Aspergillus Niger	13624	5 min
Candida Albicans	13624	1 min
Candida Albicans	16615	5 min
Candida Auris	13624	1 min
Viruses		
Effective against enveloped viruses		
SARS-CoV-1&2 and Mers	14476	30 sec

Also tested to European standards EN1276, EN13727, EN14348, EN13704, EN1650, EN14675, EN14476, EN14651, EN1656M EN16615.

The cloth that is a cut above.

Made from a newly developed, soft apertured polyester substrate, that provides superb formula retention and extreme traction. This helps pick up dirt, bacteria, and pathogens where other, thinner cloths simply push it around the surface. Also available with a completely biodegradable, 100% bamboo cloth for an environmentally friendly alternative.

While germs aren't safe, your equipment is.

Developed with key clinical equipment providers to ensure an unparalleled range of device and material compatibility. Our formula was developed to ensure the wipes will effectively clean hard surfaces and equipment without causing harm.

Cleaning & disinfection

BIODEGRADABLE

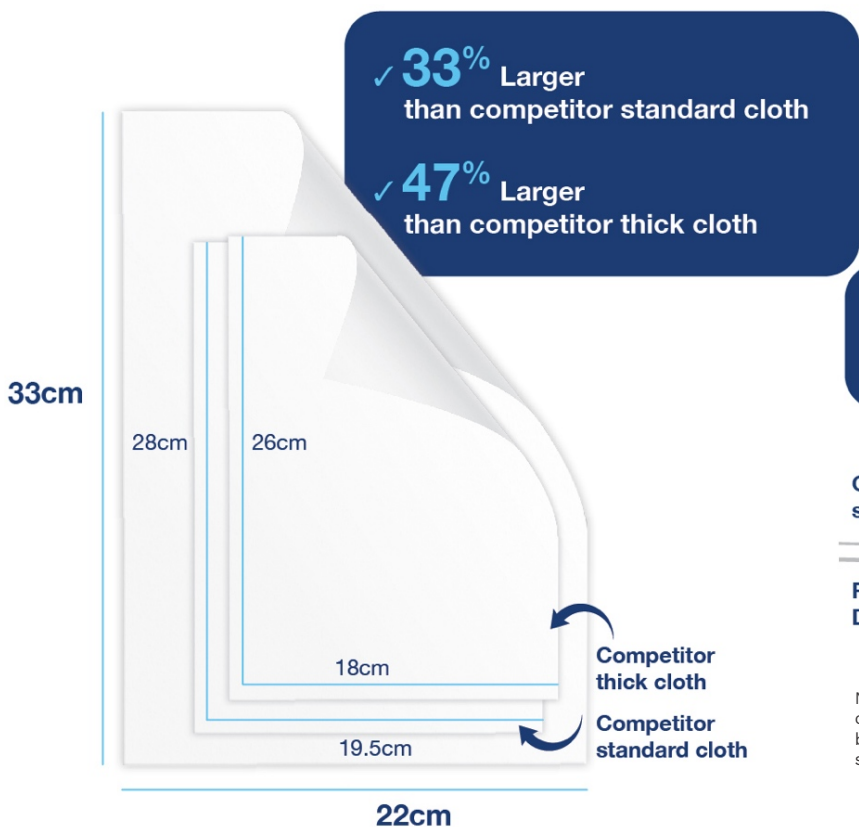

Product code	RHS210	RHS216	RHS218
Wipes per pack	50	50	100
Packs per carton	12	12	6
Wipe size	33 X 22cm	33 x 22cm	33 x 22cm

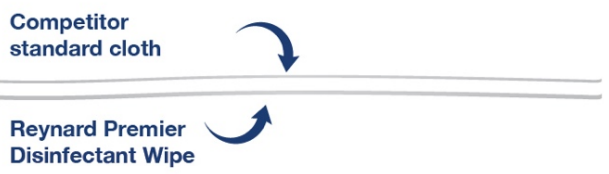

Cleaning & disinfection

Product code	RHS200	RHS219	RHS205
Wipes per pack	200	200	280
Packs per carton	6	12	2
Wipe size	28 x 22cm	22 x 20cm	28 x 25cm

✓ Reynard Premier Disinfectant Wipe is a **28%** thicker cloth

Note: the above comparison is with the RHS216, RHS218 and RHS210 cloth. Our RHS219, RHS200 and RHS205 cloth is a thinner thermal bond cloth with similar thickness to the competitor cloth but still slightly larger.

Reynard is reassurance.

Neutral detergent wipes

With a non-tainting, low foaming formula that is moist enough to effectively clean surfaces without drying, spotting, or leaving residue. They are safe to use on most hard surfaces including mattress covers, tables & other hospital equipment as well as in the home. Our formula is alcohol and fragrance free and can be used on vinyl and leather. Approved for use by multiple local & global medical equipment manufacturers.

Disposable microfibre range

What is a microfibre cloth?

Our cloths are a microfibre blend of polyimides, each fibre is finer than a single strand of silk. The material is split several times to make a finer thread which is then woven together allowing the cloth to remove dirt more efficiently from surfaces due to the higher number fibres per cm² of cloth.

Due to their thinness and density, microfibre cloths can remove dirt just by using the mechanical force created by rubbing the cloth across a surface. The dirt is absorbed deep into the spaces created between the fibres. This allows Reynard microfibre cloths to effectively Hoover up dirt particles and draw them into the cloth rather than pushing them around the surface providing a superior, chemical-free clean.

Benefits of using microfibre

Cleaning performance

- Bacterial removal capability: tested and proven to remove 99.9% of Clostridium difficile spores
- Durable, large cloths: ideal for both wet cleaning and dry dusting
- Avoids streaking

Health and safety

- Chemical free cleaning avoids pathogens developing a resistance
- Limits exposure to chemicals for staff
- Less potential for slips on wet floors and other injuries
- No heavy water buckets to carry

Environment

- Reduces water usage
- Reduces plastic consumption
- Removes the need for laundering

Cost-effective

- Cheap enough to use once but durable enough to use again and again
- Disposable cloths remove costs associated with laundering cloths

Optimal infection prevention, superior performance, and improved productivity.

Convenient and disposable, Reynard Microfibre cloths are proven to remove 99.9% of Clostridium difficile spores, effectively removing dirt without the use of harsh chemicals. Ideal for use wet, dry or used with steam for the most effective clean. Designed to deliver a high quality, chemical-free clean and reduce the potential for cross contamination.
