SINGLE USE MICROFIBRE MOP HEADS & CLOTHS

A more efficient and effective solution for healthcare facilities

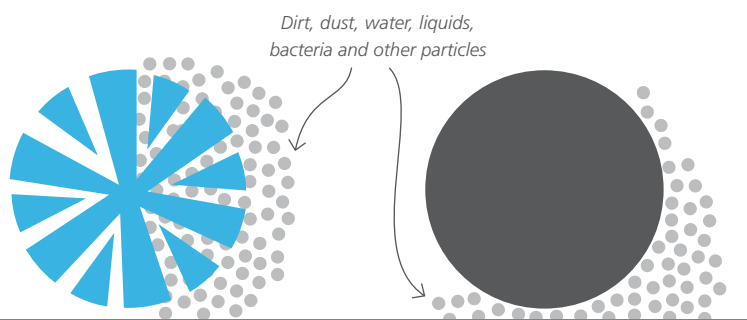

Haines[®]
MEDICAL AUSTRALIA

FOR THOSE NEW TO MICROFIBRE CHARGING

Microfibre charging is a day-to-day commercial cleaning method, popular in hospitals and healthcare facilities requiring regular, quick, but comprehensive cleaning of hard surfaces.

With a microfibre charging system, a stack of dry cloths (or mop heads) is placed into an applicable charging bucket with water or suitable cleaning solution (detergent or disinfectant). Once the liquid is fully absorbed and the cloths are wet, they are accessed one by one as required, by carers or cleaners.

MICROFIBRE

Split microfibre filaments attract and capture contaminants, leaving minimal residue

STANDARD FIBRE

Natural cloth fibres push contaminants around without capturing them, leaving behind residue

Illustration adapted from Wijendra H 2014. Textile Learner. Applications of Microfibre.³

For more information, request a copy of our Microfibre Charging User Guide today.

EFFECTIVE WITHOUT CHEMICALS

Haines[®] Single Use Microfibre Mop Heads & Cloths are effective when used with water alone, but may also be used with detergents or disinfectants where required. Due to their effectiveness with water alone, they are ideal for use in sensitive environments including:

- rooms of patients with Idiopathic Environmental Intolerance (IEI)
- newborn nurseries
- around sensitive equipment

HAINES[®] SINGLE USE MICROFIBRE MOP HEADS & CLOTHS ARE PROVEN TO REMOVE OVER 99.7% OF MRSA, VRE AND C. DIFFICILE⁴.

Independent testing of Haines[®] Single Use Microfibre Mop Heads & Cloths was performed in Australia by Merieux, a NATA-accredited testing facility. The products were tested using deionised water alone, under conditions designed to resemble surface contamination in a clinical environment.

Healthcare
Cleaning Supplies

REUSABLE MICROFIBRE MOP HEADS

Haines[®]
MEDICAL AUSTRALIA

A practical floor cleaning solution for healthcare facilities

Haines[®] Reusable Microfibre Flat Mop Heads are durable, highly absorbent and compatible with leading mop handles. They are machine washable and designed to be used wet AND dry, offering a cost effective and straightforward option for hospitals, aged care and healthcare facilities.

Split microfibre technology has proven to be superior in reducing microbial loads in clinical areas when used with a detergent cleaner, without the need for additional disinfectants.^{4,5}

Haines Reusable Microfibre Mop Heads are colour coded for use in particular areas (as indicated). This mitigates the risk of oversight and contamination, whilst complying with National Infection Control Guidelines.

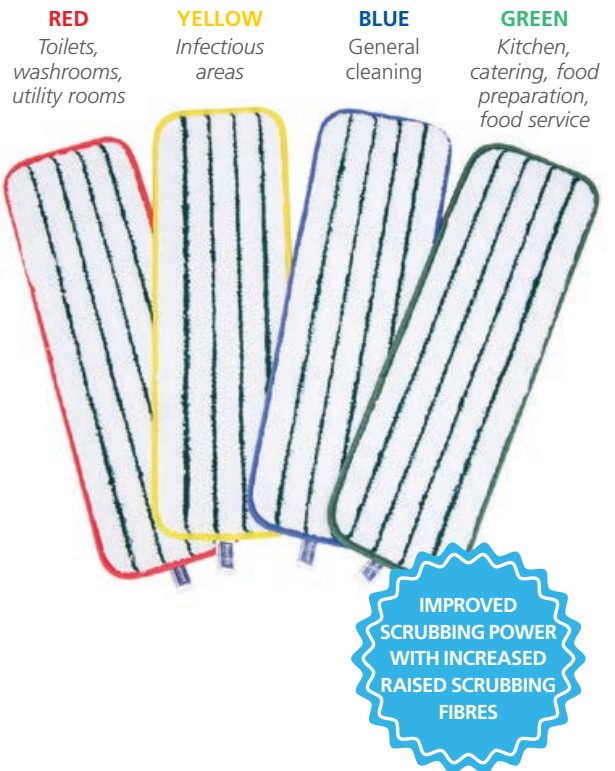

FEATURES

- **Economical** - only \$4.90 each
- **Fall risk reduction** - no more wet floors to slip on³
- Absorbent and quick-drying - reducing bacterial growth
- **Colour coded** for easy oversight - no cross contamination²
- **Split microfibre technology** has proven superior in microbial load reduction⁴
- Overlocked edging for durability
- Compatible with the leading mop handles available; no need to replace equipment
- **Time saver** - microfibre carries a charge, effectively trapping dust and dirt⁵
- Easy to change
- Suitable for both wet and dry use
- **Machine washable**

COLOUR GUIDELINES FOR CLEANING

Colour coding helps reduce the risk of cross contamination, improves hygiene and reduces the risk of bacteria transfer between work areas.

 General cleaning	 Kitchen, catering, food preparation, food service
 Toilets, washroom, utility room	 Infectious areas
